DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 10-16, drawn to a method of "obtaining... an acidification kinetic" during a process for making cheese or other fermented dairy products.

Group II, claim 17, drawn to an assay method of screening and selecting *Streptococcus* strains.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: while the method of making fermented dairy products involves the use of a *Streptococcus thermophilus* strain which is partially incapable of hydrolyzing urea, it does not involve an assay method for screening and selecting these microorganisms, prior to their use in fermentation reactions. Group I would be classified and searched in class 426, subclass 42, whereas Group II would be separately classified and searched in class 435, subclass 7.34.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
